SUMMARY

Bachelor's degree graduate in Informatics Engineering from Widyatama University with a strong interest in Data Analytics and Business Intelligence. Experienced in web development, data analysis, and educational project management, including delivering 20+ seminars to over 800 students and establishing partnerships with 25 schools across Greater Jakarta. Proficient in SQL, Python, Power BI, and Agile methodologies, with strong analytical, communication, and collaboration skills. Seeking opportunities as a Data Analyst or Business Intelligence professional to deliver data-driven insights and business solutions. Passionate about leveraging data science to drive actionable insights and strategic decision-making, complemented by hands-on experience through a bootcamp at Dibimbing.id.

EXPERIENCE

Data Entry ***March 2024 – Present***

- Maintained 1,000+ operational records weekly using Microsoft Excel and SQL, ensuring data accuracy and consistency for daily business operations.
- Validated operational data before processing, reducing input errors and improving overall data quality.
- Extracted and organized data using SQL queries to support reporting and operational analysis.
- Collaborated with cross-functional teams to ensure data availability and alignment with business requirements.
- Prepared periodic monitoring reports to support operational evaluation and data-driven decision-making.

Web Programmer (Freelance) **July 2024 - Present**

- Developed 8 responsive websites using HTML, CSS, JavaScript, and supporting frameworks based on client requirements.
- Designed user interfaces and user experiences (UI/UX) using Figma and Adobe XD, improving usability and user satisfaction.
- Implemented website features and optimized performance to ensure functionality, responsiveness, and security.
- Collaborated with clients and development teams to deliver projects on schedule and according to business requirements.
- Prepared technical documentation to support website maintenance and future development.

System Analyst Intern

Dana Pensiun Telkom **September 2023 – December 2023**

- Analyzed more than 1,000 pension records to support data validation and improve reporting accuracy.
- Developed business process documentation, SOPs, and system requirement analysis to enhance operational efficiency.
- Created process flow diagrams, analytical reports, and technical documentation to support system development.
- Collaborated with end users and developers to gather business requirements and improve application functionality.

Head of Fundraising Division **February 2022 – February 2023**

- Led the Fundraising Division in planning and executing organizational programs throughout one management period.
- Established partnerships with external stakeholders, including SMEs and sponsors, to support organizational funding initiatives.
- Managed the organization's Instagram account to increase engagement and promote organizational activities.
- Coordinated external speakers, influencers, and partners to ensure the successful execution of organizational events.

EDUCATION

- **Data Analyst - Dibimbing.id Bootcamp** **April 2026 - Present**
  Relevant Coursework: Descriptive Statistic, Hypothesis Testing Concept, Data Cleaning, Data Manipulation, Data Visualization, Exploratory Data Analysis, SQL, Machine Learning.

- **Bachelor of Informatics Engineering - Widyatama University** **Jul 2013 - Jul 2017**
  GPA: 3.10 / 4.00
  Database Systems, Data Structures & Algorithms, Software Engineering, Information Systems Analysis and Design, Artificial Intelligence, Data Mining, Business Intelligence, Statistics

RECENT PROJECTS

Web-Based Inventory Management Information System *(Final Project)* **Jun 2025**

- Developed a web-based Inventory Management System for UD. Diamond Hill using EOQ (Economic Order Quantity) and ROP (Reorder Point) methods to optimize inventory planning.
- Designed inventory modules including product management, suppliers, purchase orders, stock in/out transactions, and inventory reports.
- Built an interactive dashboard to monitor inventory movement and support operational decision-making.
- Implemented automated inventory calculations to reduce stock shortages and improve stock replenishment efficiency.

Web-Based Internship Management System **Dec 2023**

- Developed an Internship Management System for Dana Pensiun Telkom to digitalize internship registration, attendance, activity logs, and reporting.
- Designed administrative dashboards to monitor internship activities and student progress.
- Implemented internship application, attendance tracking, and activity reporting modules.
- Improved administrative efficiency by replacing manual documentation with a centralized digital system.

Web-Based E-Ticketing Reservation System **Jan 2023**

- Developed an online bus ticket reservation system with real-time seat availability and booking management.
- Implemented seat selection, booking confirmation, payment information, and route management features.
- Designed an administrative dashboard for reservation monitoring and operational management.
- Improved booking efficiency by reducing manual reservation processes.

CERTIFICATIONS

- **English Proficiency Test (EPT) | Score: 500**
  Widyatama University Language Center | **Oct 2025**
- **Database Administrator (BNSP)** **Nov 2024**
  Skills: SQL, Database Administration, Database Design, Data Management
- **Certificate of Appreciation – Internship Program** **Dec 2023**
  Skills: Data Analysis, Business Process Analysis, System Analysis
- **Merdeka Belajar Kampus Merdeka (MBKM) Program** **Jul 2023**
  Skills: Systems Analysis, Project Management
- **Mini Workshop: State of the Art Scientific Writing** **Jan 2024**
  Supervised Machine Learning, Advanced Learning Algorithms

SKILLS

Soft Skills: Analytical Thinking, Problem Solving, Attention to Detail, Communication, Teamwork
Technical Skills: SQL (PostgreSQL, MySQL),Python (Pandas, NumPy, Matplotlib), Microsoft Excel (Pivot Tables, Power Query, Lookup Functions), Power BI, Tableau, ETL & Data Warehouse, Data Analysis & Data Visualization, HTML, CSS, JavaScript, PHP (Laravel), Git & GitHub
